

The sheer scope of this monumental work makes its achievement difficult to summarize. In essence though utilizing arguments only from modern physics and its underlying logic Principia Logica demonstrates how the very existence and also the particular form of our universe can be accounted for out of absolutely nothing. Along the way it also reveals several key discoveries such as the curved nature of time, entropy conservation, the hyperspheric form of the universe and numerous other things. Also showcased is a comprehensive programme for the revival of Logicism and Logical Empiricism as an overarching context for our knowledge. All in all Principia Logica represents probably the single greatest intellectual achievement of our generation.
